Subject Index of Volume 214

Alloys
dielectric stability of oxides formed on NiCrAlY-coated substrates, 253
Aluminium oxide
gradient-index optical filter from non-stoichiometric aluminium oxide films, 1
phase transformation in chemically vapour-deposited κ-alumina, 132
Amorphous materials
diamond-like amorphous carbon films prepared by r.f. sputtering in argon, 35
in situ phosphorus doped alpha silicon films for micromechanical structures, 261
Anisotropy
line focus acoustic microscopy to measure anisotropic acoustic properties of thin films, 25
Arsenic
transmission electron microscopy investigation of the post-nucleation growth structure of amorphous cadmium arsenide thin films, 117
Auger electron spectroscopy
study of carbon film on the surface of N+B ion implanted layer, 164

Boron
gaseous boronizing with solid boron-yielding agents, 44

Cadmium
transmission electron microscopy investigation of the post-nucleation growth structure of amorphous cadmium arsenide thin films, 117
Cadmium sulphide
preparation and fundamental properties of CdS–CdTe heterojunctions, 92
Cadmium telluride
effects of cell width on the photovoltaic properties of sintered $Cd_{1-x}Zn_xS$/CdTe solar cells, 207
preparation and fundamental properties of Cds–CdTe heterojunctions, 92
Carbon
diamond-like amorphous carbon films prepared by r.f. sputtering in argon, 35
mechanical properties of hydrogenated hard carbon films, 58
study of carbon film on the surface of N+B ion implanted layer, 164
Chemical vapour deposition
effects of deposition temperature and annealing process on the superconducting properties of $YBa_2Cu_3O_{7-x}$ thin films prepared by metal organic chemical vapor deposition, 229
phase transformation in chemically vapour-deposited κ-alumina, 132
properties of fluorine doped tin oxide films produced by atmospheric pressure chemical vapor deposition from tetramethyltin, bromotrifluoromethane and oxygen, 175
texture formation of diamond film synthesized in the C–H–O system, 123
Chromium
degradation of CrSi(W)–O resistive films, 84
Coatings
dislocations and hardness of hard coatings, 4
high stability titanium nitride based solar control films, 213
influence of preparation conditions on the surface roughness of SiC thin films coated on 304 stainless steel, 150
X-ray residual stress measurement in TiN, ZrN and HfN films using the Seemann–Bohlin method, 169
Computer simulation
modelling of physical processes in ion lithography, 144
two-dimensional finite element method simulation of Vickers indentation of hardness measurements on TiN-coated steel, 68
Copper
preparation and properties of selenized $CuInSe_2$ thin films, 194

Deposition processes
laser optical coatings produced by ion beam assisted deposition, 188
Depth profiling
depositing In_2O_3 films as conductive buffer layers for high-temperature $YBa_2Cu_3O_{7-x}$ superconducting thin films on silicon, 235
Diamond
diamond-like amorphous carbon films prepared by r.f. sputtering in argon, 35
texture formation of diamond film synthesized in the C–H–O system, 123
Dielectric properties
dielectric stability of oxides formed on NiCrAlY-coated substrates, 253

Elastic properties
phase transformation and mechanical properties of thin $MoSi_2$ films produced by sputter deposition, 48
Electrical properties
electrical and optical properties of $LiNbO_3$, 219
preparation and fundamental properties of CdS–CdTe heterojunctions, 92
properties of fluorine doped tin oxide films produced by atmospheric pressure chemical vapor deposition from tetramethyltin, bromotrifluoromehtane and oxygen, 175
Electronic devices
grafting of oxidized silicon nitride insulator for the preparation of ion-sensitive field effect transistor monolayer membranes, 110
modelling of physical processes in ion lithography, 144
Ellipsometry
ellipsometric characterization of surface oxidation in polycrystalline Zn_3P_2 thin films, 74
Evaporation
Fourier transform IR study on structural evaluation of evaporated organic thin films. Part 1. Changes in molecular orientation of *n*-paraffins by heat treatment, 99

Fourier transform infrared spectroscopy
Fourier transform IR study on structural evaluation of evaporated organic thin films. Part 1. Changes in molecular orientation on *n*-paraffins by heat treatment, 99

Growth mechanism
transmission electron microscopy investigation of the post-nucleation growth structure of amorphous cadmium arsenide thin films, 117

Hardness
dislocations and hardness of hard coatings, 4
phase transformation and mechanical properties of thin $MoSi_2$ films produced by sputter deposition, 48
two-dimensional finite element method simulation of Vickers indentation of hardness measurements on TiN-coated steel, 68
Heterostructures
preparation and fundamental properties of CdS–CdTe heterojunctions, 92

Indium
preparation and properties of selenized $CuInSe_2$ thin films, 194
Indium oxide
depositing In_2O_3 films as conductive buffer layers for high-temperature $YBa_2Cu_3O_{7-x}$ superconducting thin films on silicon, 235
Inorganic compounds
gaseous boronizing with solid boron-yielding agents, 44
Ion bombardment
laser optical coatings produced by ion beam assisted deposition, 188
modelling of physical processes in ion lithography, 144
Ion implantation
study of carbon film on the surface of N+B ion implanted layer, 164
Iron
gaseous boronizing with solid boron-yielding agents, 44

Langmuir–Blodgett films
photoinduced charge transfer in rhodamine B/anthracene mixed Langmuir–Blodgett multilayers, 243
preparation and characterization of Langmuir–Blodgett films of porphyrins without long alkyl chains, 238
Laser ablation
new laser ablation geometry for the production of smooth thin single-layer $YBa_2Cu_3O_{7-x}$ and multilayer $YBa_2Cu_3O_{7-x}PrBa_2Cu_3O_{7-x}$ films, 223
Lead
structure and the piezoelectric properties of thin $Pb(Zr_{0.53}Ti_{0.45}W_{0.01}Cd_{0.01})O_3$ films, 78
Lead oxide
chemical and tribological characterization of PbO–MoS_2 films grown by pulsed laser deposition, 156
Lithium
electrical and optical properties of $LiNbO_3$, 219

Mossbauer spectroscopy
influence of the sputtering parameters on the composition and crystallinity of tin oxide, 6
Molybdenum
chemical and tribological characterization of PbO–MoS_2 films grown by pulsed laser deposition, 156
influence of tellurium on the properties of $MoSe_{2-x}Te_x$ textured thin films, 200
phase transformation and mechanical properties of thin $MoSi_2$ films produced by sputter deposition, 48
Monolayers
preparation and characterization of Langmuir–Blodgett films of porphyrins without long alkyl chains, 238
Multilayers
high stability titanium nitride based solar control films, 213
photoinduced charge transfer in rhodamine B/anthracene mixed Langmuir–Blodgett multilayers, 243
preparation and characterization of Langmuir–Blodgett films of porphyrins without long alkyl chains, 238

Niobium
electrical and optical properties of $LiNbO_3$, 219
Nitrides
X-ray residual stress measurement in TiN, ZrN and HfN films using the Seemann–Bohlin method, 169

Optical coatings
gradient-index optical filter from non-stoichiometric aluminium oxide films, 1
laser optical coatings produced by ion beam assisted deposition, 188
Optical properties
gradient-index optical filter from non-stoichiometric aluminium oxide films, 1
high stability titanium nitride based solar control films, 213
photoinduced charge transfer in rhodamine B/anthracene mixed Langmuir–Blodgett multilayers, 243
preparation and fundamental properties of CdS–CdTe heterojunctions, 92
reproducibility of the coloration processes in TiO_2 films, 17
Optical spectroscopy
photoinduced charge transfer in rhodamine B/anthracene mixed Langmuir–Blodgett multilayers, 243
preparation and characterization of Langmuir–Blodgett films of porphyrins without long alkyl chains, 238
Organic substances
Fourier transform IR study on structural evaluation of evaporated organic thin films. Part 1. Changes in molecular orientation of *n*-paraffins by heat treatment, 99
Oxidation
ellipsometric characterization of surface oxidation in polycrystalline Zn_3P_2 thin films, 74
gaseous boronizing with solid boron-yielding agents, 44
grafting of oxidised silicon nitride insulator for the preparation of ion-sensitive field effect transistor monolayer membranes, 110
Oxides
depositing In203 films as conductive buffer layers for high-temperature YBa2Cu307-x superconducting thin films on silicon, 235
dielectric stability of oxides formed on NiCrAlY-coated substrates, 253
effects of deposition temperature and annealing porcess on the superconducting properties of $YBa_2Cu_3O_{7-x}$ thin films prepared by metal organic chemical vapor deposition, 229
electrical and optical properties of $LiNbO_3$, 219
new laser ablation geometry for the production of smooth thin single-layer $YBa_2Cu_3O_{7-x}$ and multilayer $YBa_2Cu_3O_{7-x}$/$PrBa_2Cu_3O_{7-x}$ films, 223
structure and the piezoelectric properties of thin $Pb(Zr_{0.53}Ti_{0.45}W_{0.01}Cd_{0.01})O_3$ films, 78

Phase transformation
phase transformation in chemically vapour-deposited κ-alumina, 132
phase transformation and mechanical properties of thin MoSi2 films produced by sputter deposition, 48
Phosphorous
ellipsometric characterization of surface oxidation in polycrystalline Zn_3P_2 thin films, 74
Photovoltage
effects of cell width on the photovoltaic properties of sintered $Cd_{1-x}Zn_xS$/CdTe solar cells, 207
Physical vapour deposition
diamond-like amorphous carbon films prepared by r.f. sputtering in argon, 35

influence of preparation conditions on the surface roughness of SiC thin films coated on 304 stainless steel, 150
influence of the sputtering parameters on the composition and crystallinity of tin oxide, 6
Piezoelectric effect
structure and the piezoelectric properties of thin $Pb(Zr_{0.53}Ti_{0.45}W_{0.01}Cd_{0.01})O_3$ films, 78

Resistivity
degradation of CrSi(W)–O resistive films, 84

Selenide
preparation and properties of selenized $CuInSe_2$ thin films, 194
Selenium
influence of tellurium on the properties of $MoSe_{2-x}Te_x$ textured thin films, 200
Sensors
in situ phosphorus doped alpha silicon films for micromechanical structures, 260
Silicides
degradation of CrSi(W)–O resistive films, 84
phase transformation and mechanical properties of thin $MoSi_2$ films produced by sputter deposition, 48
Silicon
in situ phosphorous doped alpha silicon films for micromechanical structures, 260
Silicon carbide
influence of preparation conditions on the surface roughness of SiC thin films coated on 304 stainless steel, 150
Silicon nitride
grafting of oxidized silicon nitride insulator for the preparation of ion-sensitive field effect transistor monolayer membranes, 110
Solar cells
effects of cell width on the photovoltaic properties of sintered $Cd_{1-x}Zn_xS$/CdTe solar cells, 207
Sputtering
preparation and properties of selenized $CuInSe_2$ thin films, 194
Stress
mechanical properties of hydrogenated hard carbon films, 58
X-ray residual stress measurement in TiN, ZrN and HfN films using the Seemann–Bohlin method, 169
Structural properties
texture formation of diamond film synthesized in the C–H–O system, 123
Sulphides
chemical and tribological characterization of PbO–MoS_2 films grown by pulsed laser deposition, 156
Superconductivity
depositing In_2O_3 films as conductive buffer layers for high-temperature $YBa_2Cu_3O_{7-x}$ superconducting thin films on silicon, 235
effects of deposition temperature and annealing process on the superconducting properties of $YBa_2Cu_3O_{7-x}$ thin films prepared by metal organic chemical vapor deposition, 229
new laser ablation geometry for the production of smooth thin single-layer $YBa_2Cu_3O_{7-x}$ and multilayer $YBa_2Cu_3O_{7-x}$/$PrBa_2Cu_3O_{7-x}$ films, 223
Surface morphology
properties of fluorine doped tin oxide films produced by atmospheric pressure chemical vapor deposition from tetramethyltin, bromotrifluoromethane and oxygen, 175
texture formation of diamond film synthesized in the C–H–O system, 123
Surface phonons
line focus acoustic microscopy to measure anisotropic acoustic properties of thin films, 25
Surface roughness
influence of preparation conditions on the surface roughness of SiC thin films coated on 304 stainless steel, 150

Tellurium
influence of tellurium on the properties of $MoSe_{2-x}Te_x$ textured thin films, 200
Tin oxide
influence of the sputtering parameters on the composition and crystallinity of tin oxide, 6
properties of fluorine doped tin oxide films produced by atmospheric pressure chemical vapor deposition from tetramethyltin, bromotrifluoromethane and oxygen, 175
Titanium
structure and the piezoelectric properties of thin $Pb(Zr_{0.53}Ti_{0.45}W_{0.01}Cd_{0.01})O_3$ films, 78
Titanium dioxide
reproducibility of the coloration processes in TiO_2 films, 17
Titanium nitride
high stability titanium nitride based solar control films, 213
two-dimensional finite element method simulation of Vickers indentation of hardness measurements on TiN-coated steel, 68
Transmission electron microscopy
transmission electron microscopy investigation of the post-nucleation growth structure of amorphous cadmium arsenide thin films, 117
Tribology
chemical and tribological characterization of PbO–MoS_2 films grown by pulsed laser deposition, 156
mechanical properties of hydrogenated hard carbon films, 58

X-ray diffraction
effects of deposition temperature and annealing process on the superconducting properties of $YBa_2Cu_3O_{7-x}$ thin films prepared by metal organic chemical vapor deposition, 229
gaseous boronizing with solid boron-yielding agents, 44
influence of tellurium on the properties of $MoSe_{2-x}Te_x$ textured thin films, 200
influence of the sputtering parameters on the composition and crystallinity of tin oxide, 6
X-ray residual stress measurement in TiN, ZrN and HfN films using the Seemann–Bohlin method, 169
X-ray photoelectron spectroscopy
chemical and tribological characterization of PbO–MoS_2 films grown by pulsed laser deposition, 156
grafting of oxidized silicon nitride insulator for the preparation of ion-sensitive field effect transistor monolayer membranes, 110
reproducibility of the coloration processes in TiO_2 films, 17
study of carbon film on the surface of N+B ion implanted layer, 164

Zinc
ellipsometric characterization of surface oxidation in polycrystalline Zn_3P_2 thin films, 74
Zirconium
structure and the piezoelectric properties of thin $Pb(Zr_{0.53}Ti_{0.45}W_{0.01}Cd_{0.01})O_3$ films, 78
